About us

Bourn Hall Clinic was the worlds first IVF/ART clinic. It was founded in 1980 by Partick Steptoe and Robert Edwards, the pioneers of IVF who were responsible for the birth of Louise Brown. Staff at Bourn Hall aim to provide the best quality treatment possible in a caring and supportive environment.

About us

This centre was recently relocated to a purpose built fertility clinic within the Jessop Wing at Royal Hallamshire Hospital. In addition to offering a wide range of fertility treatments it is a recognised centre for laparoscopic surgery. Mr T C Li and Professor Ledger jointly head the Reproductive Medicine service. Mr Jonathan Skull leads the ACU with Mr Hany Lashen, Senior Lecturer in Reproductive Medicine.

About us

This ACU provides a combined approach to infertility. Both partners are screened for a treatable factor during two consultations a month or so apart. Baseline diagnostic tests are arranged prior to initial consultation, which is used to focus on any abnormal test results. A comprehensive treatment plan is formed by a gynaecologist and/or male infertility specialist team.

About us

This small centre's team is dedicated to helping couples with thorough investigation, diagnosis and treatment of sub-fertility. First consultations usually last an hour, in order to take a complete patient history and listen to any concerns. Couples are seen by the same nurse specialist or consultant at each visit and are guided towards the most appropriate treatment for their problem.

About us

The Isis Fertility Centre was established in 1999 and moved to stand-alone premises in 2003. Treatment is provided in a professional and caring environment where patients' needs and expectations are paramount. A thorough investigation is carried out very quickly and an individual treatment plan is developed, based on the individual's history, test results and personal circumstances.

About us

This centre opened in 1988 and IVF treatment started in 1993. Over 60% of the IVF treatment carried out is ICSI, much of this after surgical sperm retrieval. The department moved into much improved purpose designed accommodation in June 2003. The full range of diagnostic and treatment options is available except for pre-implantation genetic diagnosis and egg storage.

About us

Established in 1988, this ACU has been housed in a purpose-built unit within the Women's Hospital since 1996. The dedicated and expert team includes two consultant gynaecologists, embryologists and nursing and counselling staff who offer care and support throughout treatment. This relatively small unit offers a very personal service and patients get to know the approachable staff very well.

About us

The London Fertility Centre pioneered IVF over 25 years ago and provides comprehensive services for different causes of infertility. The centre's 'firsts' include first twin, egg donor and ICSI births. The dedicated team treats all patients with flexible and individual care. Welcome evenings, patient support group and counselling are all available.

About us

This centre has a long tradition of providing high quality patient care. All staff strive to remove the fears associated with infertility, sub-fertility and assisted conception. The staff are also committed to helping people fully understand infertility and IVF treatment, and are also keen to learn about each patient's needs. The clinic answers questions and provides information over the telephone, or via a full information pack.

About us

This is an NHS funded fertility unit situated in a major teaching hospital. It offers a comprehensive service for investigation of sub-fertility and a full range of treatments up to the point of IVF, which is not provided here under NHS contract. The centre also houses one of the largest sperm storage facilities in the UK and this is available to all oncology patients.

About us

This unit has a professional team offering advice and support, including experienced fertility nurses, a counsellor, gynaecologists, obstetrician, embryologists and a consultant urologist who specialises in male fertility. It is housed in a separate unit which offers patients the confidence of complete confidentiality. New patients are invited to an informal visit, when they can discuss treatment options.
