

F-2013-00122 - Number of HLA treatments carried out

10 May 2013

Summary of request

The Authority was asked for the number of HLA treatments that have been carried out since the first such case.

HFEA response

After extracting the data from the HFEA Register we can confirm that there have been 29 HLA treatments that have resulted in embryos being transferred to the patient. Further information on HLA treatments can be found from a previous Freedom of Information request here:
