

**F-2012-00277 - Success rates for TESE recovered sperm from post-vasectomy donors**

17 November 2012

**Summary of request**

The Authority was asked for information regarding ICSI treatments using TESE recovered sperm post-vasectomy.

**HFEA response**

We do not hold information on whether sperm donors have had vasectomies or not. We do collect data on testicular sperm recovery but these figures will include sperm not just collected via TESE but also via TESA.
