

F-2015-00002- clinic-level indicators

19th January 2015

Summary of request

The Authority was asked for various clinic-level indicators for patients under 35 years old and over 35 years old for all available years.

HFEA response

Please find that information attached. I have included every centre that has ever existed so many of them will appear blank for a number of years when they were not operating. I have included data since 1991 when the HFEA was founded but be aware that not all information you have requested is available from that date. A number of the columns have been appended with a number which relate to the explanatory below which explain a data more fully:

- (1) In Licenced Treatments
- (2) Only include in post 2000 forms
- (3) Post Oct' 2007 only forms
- (4) Post Oct' 2007 Fresh Only forms
- (5) Any cycles using Donor Eggs - With Partner Sperm
- (6) Any cycles using Donor Eggs and Donor Sperm
- (7) Any cycles using Patients Own Eggs - With Donor Sperm
- (8) Fresh Only cycles

I have also replaced small numbers with a '<5' figure because there is a significant possibility that this information, when combined with other information to which you may reasonably be expected to have access, could lead to the identification of a person to whom the HFEA owes a duty of confidentiality. To disclose this information in these circumstances may therefore result in a breach of the confidentiality provisions of section 33A of the Human Fertilisation and Embryology Act 1990 (as amended), and the information is therefore exempt from disclosure under section 44 of the Freedom of Information Act 2000.
