

## **F-2017-00055 – Saviour siblings**

23 March 2017

### **Summary of request**

The Authority was asked to provide details on HLA screenings for IVF cycles and respective outcomes.

### **HFEA response**

The HFEA held some of the information requested. Data as to whether HLA screening was performed for an IVF cycle has been collected since October 2007. The table provides data from the start of 2008, which was the first full year for which data was collected.

The data that we held at the time was currently verified up until 2015/06/30 for treatment information and to 2104/06/30 for outcome data.
